Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

This course covers the main training requirements in line with the **Project Management Institute (PMI)** to enable the participants to sit for the PMI examination that will lead to their registration as **“Project Management Professionals” (PMP)**.

Management will benefit through the use of the principles of time and cost control as advocated in the Project Management Body of Knowledge (PMBOK) of the PMI. Sound principles and Tools make the control of one’s resources practical and efficient. Participants will clearly understand and use the philosophies, basic tools and techniques of project management. Further, they will understand the risks and pitfalls in administration, scope management, people management, pricing and control in projects and preventive actions to minimize project risks. The course will enable participants to apply techniques for project feasibility analysis, and analyze project viability (payback, technological and operational).

This course is in line with the **PMI (Project Management Institute)** training requirements and with the relevant experience will enable the participant to apply to the PMI for acceptance to their examination for the PMI licenses. (Details of the full PMI requirements are available on the PMI web-page, www.pmi.org)

The course is carefully developed to reflect the best practices that also match the training requirements of distinguished professional organizations such as the Project Management Institute (**PMI**) and **FIDIC**. The Professional Development Units/Hours (**PDU**s) or Continuing Education Units (**CEU**s) awarded to our participants are recognized by the Project Management Institute (**PMI**) and by the International Association for Continuing Education & Training (**IACET-USA**).

The course includes a comprehensive e-book entitled “*A Guide to the Project Management Body of Knowledge (PMBOK Guide)*”, published by Project Management Institute, which will be given to the participants to help them appreciate the principles presented in the course.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain advanced knowledge on various functions, techniques, procedures and requirements of project and construction management in line with the PMI standards
- Review the project management planning techniques including its scope, activities, networks, schedules and costs
- Identify the different kinds of project management control techniques and become familiar with the project management organizing and leadership
- Explain the purpose and scope of project charter and improve risk management process and application
- Employ quality management in construction project and acquire knowledge on life cycles and milestones including their features, importance and use
- Gain knowledge on the elements of HR in projects and recognize the significance of people and interaction management
- Determine the importance of scope control management and present scenarios and cases of scope control in construction
- Carryout project acceleration techniques and use the various key factors to be considered in managing construction contracts
- Carryout project selection using feasibility, viability and project payback and explain the elements and concerns of project pricing

Who Should Attend

This course provides an advanced overview of project and construction management for managers, engineers and supervisors who already have knowledge of project management techniques and tools as well as for the managers who are directly responsible for projects and need to manage the task professionally. The course is also beneficial for those who want to know about pitfalls in their environments when managing project management consultants.

PMI Recognition of Haward Courses

The Project Management Institute (PMI) recognizes Haward’s Certificates and Continuing Education Units (CEUs).

The recognition and acceptance of our PDUs/CEUs fall under Categories E, F and G of PMI’s “Professional Education” section at the PMP Application. Hence, what the delegates simply need to do is to complete this section as part of the PMP Application and submit it to PMI upon the receipt of Haward’s certificates and ANSI/IACET’s CEUs. PMI will automatically accept the delegates with 30 Contract Honors as a fulfillment of the required Professional Education.

Haward Technology, being the first **Authorized Provider** of the International Association for Continuing Education & Training (**IACET-USA**) in the Middle East, is authorized to award ANSI/IACET **CEUs** that are automatically accepted and recognized by the Project Management Institute (**PMI**).
