

COURSE OVERVIEW EE0120-4D

Power Generation:

**GAS TURBINES, STEAM POWER PLANTS,
CO-GENERATION AND COMBINED CYCLE PLANTS**

Selection, Applications, Operation, Maintenance and Economics

Course Title

Power Generation: GAS TURBINES, STEAM POWER PLANTS, CO-GENERATION AND COMBINED CYCLE PLANTS: *Selection, Applications, Operation, Maintenance and Economics*

Course Date/Venue

November 11-14, 2024/ Boardroom, Warwick Hotel
Doha, Doha, Qatar

Course Reference

EE0120-4D

Course Duration/Credits

Four days/2.4 CEUs/24 PDHs

Course Description

This practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.

This course is designed to provide a thorough understanding of Steam Power Plants, Gas Turbines, co-generation and combined cycle plants. Each of the components such as compressors, gas and steam turbines, heat recovery steam generators, deaerators, condensers, lubricating systems, transformers and generators are covered in detail. The selection considerations, operation, maintenance and economics of co-generation plants and combined cycles as well as emission limits, monitoring and governing systems will also be covered thoroughly. All the significant improvements that were made to co-generation and combined cycles plants during the last two decades will also be explained.

Upon the successful completion of this course, each participant will have a comprehensive understanding of combined cycle, co-generation, Steam and Gas Turbine plants as well as their selection criteria, operation and maintenance requirements, and economics.

The course includes an e-book entitled “*Power Generation Technologies*”, published by Newnes, which will be given to the participants to help them appreciate the principles presented in the course.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an in-depth knowledge on power generation
- Explain steam power plants and steam turbines and auxiliaries
- Discuss gas turbines as well as current and future gas turbine technologies
- Distinguish the concepts of combined cycles and the turbine governing system
- Identify gas turbine instrumentation and control systems
- Discuss gas turbine emission guidelines and control methods including lubrication and fuel systems
- Review the economics of power generation, co-generation and combined-cycle plants
- Illustrate the applications of co-generation and combined-cycle plants
- Define transformers and explain interconnection with grid and transformer components
- Illustrate synchronous generators and generator operation
- Discuss generator components, generator excitation, AVR and PSS
- Employ generator operation, testing, inspection and maintenance

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

Who Should Attend

This course is essential for all technical staff who are working in power generation, utilities, process and other heavy industries. This includes fresh-graduate engineers, under-development engineers and engineers who have limited experience in power generation. Further, this course is suitable for all experienced technical personnel in power generation field who have no engineering degrees or formal training in engineering. Managers and engineers of different disciplines might find this course very useful as an awareness course in power generation.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations: -

- 
The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **2.4 CEUs** (Continuing Education Units) or **24 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

- 
British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Course Fee

US\$ 5,000 per Delegate. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Professor Mike Kanova is a **Senior Electrical & Instrumentation Engineer** with **over 35 years** of industrial experience within the **Oil & Gas, Petrochemical and Refinery** industries. His expertise extends widely over the areas of **Refining & Rotating Equipment, Process Equipment, Instrumentation & Control, Control Loop Parameters, Control Loop Tuning, Surge Protect-Control, Business Management System (BMS), E&D Values & ROIVs Partial Stroke Testify, Alarm & Safety Interlocks System, P&IDs, Uninterruptible Power Supply (UPS) Design & Maintenance, UPS Construction, UPS DC & AC Types & Application, Static & Dynamic UPS, UPS Installation Methods, UPS Protection, Electric Heat Trace System, Foundation Fieldbus Data Communication & Fieldbus Systems, Data Communication & Fieldbus Systems, Fiber Optics Access**

Network Planning, Overhead Power Line Construction, Power Systems Control & Stability, Fault Analysis in Electrical Networks, **OLE for Process Control (OPC), Process Control & Instrumentation, Distribution Cables, Custody Measurement, Loss Control & Multiphase Flowmetering** of Petroleum Products, **General Instrumentation & Process Control** for Industrial Applications, **Process Instrumentation, Process Control & Instrumentation, Process Measurement & Control, Experion PKS Operator, SCADA Systems, Generator Excitation, Process Control Techniques, Programmable Logic Controllers (PLC) Operation & Maintenance, Allen Bradley PLC, Siemens SIMATIC S7 Maintenance & Configuration, Distributed Control System (DCS) Applications, Selection & Troubleshooting, Compressor Control & Protection, GE Mark V, Power Systems Control & Stability, Advanced Electrical Safety, Switchgear Maintenance & Troubleshooting, Electrical Fault Investigation, Power System Planning & Economics, Distribution System, Electrical Networks & Power Flow Analysis, Electrical Power Distribution System Performance & Methods of Improvement, Practical Fiber Optics Technology, Electric Motor Testing & Troubleshooting, Fundamentals of Telecommunication, Synchronous Digital Hierarchy (SDH) & Dense Wavelength Division Multiplexing (DWDM), WiMax Broadband Wireless, SDH Networks, IPT Avaya Network, WAN & Satellite Communication, Wireless Technology RC-400, National Electrical Code (NEC), National Electrical Safety Code (NESC), Security Systems Installation & Maintenance, Protection Relay, Power Generation, Circuit Breakers & Switchgears and Gas Turbine. Further, his experience has proven him well in the practice and has given him the chance to work with **international organizations** such as the **Instrument Society of America (ISA)**, the **Institute of Measurements and Control**, the **United Nations Educational Scientific and Cultural Organization (UNESCO)** and the **International Electrical Testing Association (NETA)**.**

During Professor Mohamed's career life, he gained extensive experience in the electrical, instrumentation and control systems engineering field through various challenging **engineering & managerial** positions that he filled while working as the **Scientist/Inventor, Project Manager, Development Engineer, Electronics Engineer, Stream Leader, Co-leader, Supervisor, Researcher, Conference Organizer, External Examiner, Lecturer** in Electronics, Opto-electronics and Power Electronics, **Course Developer, Organizing & Editorial Committee Member, Part-time Consultant and Part-time Lecturer** from the Cape Peninsula University of Technology, University of Cape Town, University of Western, University of Johannesburg Witwatersrand, Walter Sisulu University, **ESKOM, NRF, SCINAC Tokai, Plessey Southern Africa Retreat, Peninsula Technikon, SA Nylon Spinners and R&B Electronics Rondebosch.**

With the knowledge and skills he gained herein, he has produced **over 100 publications and papers** that were presented to numerous gatherings like the **International Conference on System Modelling & Control; International Conference on Industrial and Commercial Use of Energy; International Conference of Control Signals and Systems; the UICEE Annual Conference on Engineering Education, the ETMSA (Energy Technology Modelling, Simulation and Applications), the Symposium on Energy Technology, Modelling, Simulation & Applications.** Those papers were also published in journals such as the **NETA Journal; the IEEE Aerospace and Electronic Systems Journal; the International Journal of Power and Energy Systems; the Journal of the Electricity Supply Industry; the International Journal of Computers and Applications; the Journal of the Electronics Technology and the Quantum Journal.**

Professor Mohamed is a **Registered Professional Engineer** and has a **PhD, Master and Bachelor** degrees in **Electrical Engineering.** Further, he is a **Certified Instructor/Trainer, a Certified Internal Verifier/ Assessor/Trainer** by the **Institute of Leadership and Management (ILM)** and a well-respected member of the **IEEE** and is actively engaged with numerous projects in affiliation with the **Society for Photo-optical Instrumentation Engineers (SPIE), the Aerospace and Electronic Systems Society (AESS-IEEE), the Circuits and Systems Society (CSS-IEEE), the Lasers and Electro-optics Society (LES- IEEE) and the Power Electronic Society (PELS-IEEE).** He has further delivered numerous trainings, seminars, courses, workshops and conferences internationally.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1: Monday, 11th of November 2024

0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0930	Review of Thermodynamics Principles First Law • Saturated & Superheated Steam • Second Law • Carnot Cycle
0930 - 0945	Break
0945 - 1030	Steam Power Plants Rankine Cycle, Economizers, Boilers, Superheaters, Reheaters, Moisture Separators, Condensers, Deaerators, Regeneration, Pumps, Cooling Water System, Ejectors • Supercritical Plants, • Co-Generation, Topping and Bottoming Cycles, Arrangements of Co-generation Plants, Economics of Co-generation
1030 - 1130	Steam Turbines & Auxiliaries Turbine Components and Energy Extraction Mechanisms, Turbine Types, Steam Extraction, Turning Gear, Jacking Oil System, Gland Seal, Lubrication System, Journal Bearings, Thrust Bearings, Hydraulic Control Systems
1130 - 1230	Gas Turbines The Simple Gas Turbine Cycle, Gas Turbine Types, Brayton Cycle, The Nonideal Brayton Cycle, Gas Turbine Performance Characteristics, Cycle Improvement, Gas Turbine Operation, Components of a Gas Turbine Power Plant, Gas Turbine Applications, Gas Turbines Versus Other Prime Movers
1230 - 1245	Break
1245 - 1420	Current & Future Gas Turbine Technologies Non-Mast Technologies, MAST Technologies
1420 - 1430	Recap
1430	Lunch & End of Day One

Day 2: Tuesday, 12th of November 2024

0730 – 0830	Combined Cycles Modifications of the Brayton Cycle, Regeneration, Compressor Intercooling, Turbine Reheat, Water Injection • Design for High Temperature, Materials, Cooling • Combined Cycles, Combined Cycles with Heat-recovery Boiler, Combined Cycles with Multi-Pressure Steam
0830 – 0930	Combined Cycles Concepts Basic Concepts • Single-Pressure Cycle • Dual-Pressure Cycle • Reheat Cycles • Cycles with Supplementary Firing • Cycle Performance
0930 – 0945	Break
0945 – 1045	The Turbine Governing System Functions • Major Components • Turbine Operation, Speed Control, Governing System Operation • Turbine Run Up, Turbine Trip, Load Rejection, Decrease in Boiler Pressure, Hydraulic Liquid • Tripping Signals for Steam Power Plants, Tripping Signals for Gas Turbines
1045 – 1145	Gas Turbine Instrumentation & Control Systems Vibration Measurement, Pressure Measurement, Temperature Measurement • Control System, Speed Controller, Temperature Controller, Protection System, Startup and Shutdown Sequences
1145 – 1230	Gas Turbine Emission Guidelines & Control Methods Composition of Fuels, • Emissions from Gas Turbines • NOx Emission Target Levels • NOx Emission Control Methods, Water and Steam Injection, Selective Catalytic Reduction (SCR), Dry Low NOx Combustors
1230 – 1245	Break
1245 – 1420	Gas Turbines Lubrication & Fuel Systems Lubricating Systems, Cold Start • Fuel Systems, Water and Sediment, Carbon Residue • Metallic Constituents and Sulphur • Gas Fuel Systems • Gas Turbine Starting, Intake and Exhaust Systems
1420 – 1430	Recap
1430	Lunch & End of Day Two

Day 3: Wednesday, 13th of November 2024

0730 – 0815	Economics of Power Generation Principles of Power Plant Design • Location of Power Plant • Cost Analysis • Selection of Type of Generation • Selection of Power Plant Equipment • Economics in Plant Selection • Factors Affecting the Economics of Power Generation • Power Plant – Useful Life • Performance and Operating Characteristics of Power Plants • Economic Load Sharing
0815 – 0930	Economics of Co-Generation & Combined-Cycle Plants Co-Generation Steam Considerations • Co-Generation Application Considerations • Combined Cycle Selection and Economics • Economic Considerations for Performance Enhancement
0930 – 0945	Break
0945 – 1015	Applications of Co-Generation & Combined-Cycle Plants Justification • Applications, Re-Powering, Process Plants
1015 – 1045	Transformers Importance, Types and Construction • Operation & Losses • Impedance Transformation • Circuits, Power Transmission and Losses • Magnetizing Current

1045 – 1230	Interconnection with Grid & Transformer Components Interconnection with the Grid, Power Distribution, Main Output Transformers, Unit Service Transformers, Station Service Transformers • Transformer Classifications and Ratings, Cooling Methods • Main Components of a Power Transformer, Gas Detector Relays, Transformer Oil Characteristics • Transformer Tap Changers
1230 – 1245	Break
1245 – 1420	Synchronous Generators Construction, Speed • Excitation Methods • Internal Generated Voltage • Equivalent Circuit, Phasor Diagram, Power and Torque
1420 – 1430	Recap
1430	Lunch & End of Day Three

Day 4: Thursday, 13th of November 2024

0730 – 0830	Synchronous Generator Operation Operating Alone • Parallel Operation • Frequency-Power and Voltage-Reactive Power Characteristics • Operation of Generators in Parallel with Large Power Systems • Ratings (Voltage, Speed and Frequency) • Capability Curves
0830 – 0900	Generator Components Rotor • Stator • Seals
0900 – 0915	Break
0915 – 1045	Generator Excitation, AVR and PSS Generator Excitation • Automatic Voltage Regulator (AVR) • Power System Stabiliser (PSS)
1045 – 1230	Generator Operation, Testing, Inspection & Maintenance Operation • Testing • Inspection • Maintenance • Repairs
1230 – 1245	Break
1245 – 1345	Summary, Open Forum & Closing
1345 – 1400	Course Conclusion
1400 – 1415	POST-TEST
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

Practical Sessions

This practical and highly-interactive course includes real-life case studies and exercises:-

Book(s)

As part of the course kit, the following e-book will be given to all participants:

Title : Power Generation Technologies
ISBN : 978-0080983301
Author : Mr. Paul Breeze
Publisher : Newnes

Course Coordinator

Jaryl Castillo, Tel: +974 4423 1327, Email: jaryl@haward.org
