

COURSE OVERVIEW ME0180

Boiler & Steam System Management

Performance, Efficiency, Troubleshooting, Tune-Up, Heat Recovery & Optimization

Course Title

Boiler & Steam System Management:
Performance, Efficiency, Troubleshooting, Tune-Up, Heat Recovery & Optimization

Course Date/Venue

Session 1: February 11-15, 2024/Kizkulesi,
Crown Plaza Istanbul Asia Hotels &
Convention Center, Istanbul, Turkey
Session 2: March 03-07, 2024/Oryx Meeting
Room, Doubletree By Hilton Doha-Al
Sadd, Doha, Qatar

Course Reference

ME0180

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

This course provides practical information that can be readily applied to pinpoint and minimize energy losses in boiler plants and energy distribution systems. Participants will be guided through their plant system component by component, showing exactly where and how performance can be improved. Facts will be given on different fuel types and firing methods, and how modern high-efficiency boiler designs and control systems work.

Following easy-to-implement guidelines and helpful, time-saving diagrams-participants will go over strategies to methodically achieve the maximum utilization of fuel and energy to keep operating costs low and equipment performance high.

In addition to the comprehensive training manual, the course includes an e-book entitled “Boiler Operator’s Guide”, published by McGraw-Hill Professional, which will be given to the participants to help them appreciate the principles presented in the course.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an in-depth knowledge on boiler and steam system management
- Perform boiler tuning-up and identify its troubleshooting problems
- Discuss waste heat recovery
- Use test instruments and computers to cut costs in an effective manner
- Apply standard plant calculations including boiler plant safety, boiler controls and 60 ways to improve the plant
- Carryout steam distribution systems, steam traps and pollution control

Who Should Attend

This course provides an overview of all significant aspects and considerations of boiler and steam system management for facilities engineers, operating engineers, energy engineers, managers, supervisory personnel, designers, inspectors, consultants and other technical staff who are involved in the performance, efficiency, troubleshooting, tune-up, heat recovery and optimization of boiler and steam system. The course will provide a clear and refreshing examination of boilers and their systems. It covers a range from very large to small boiler systems and is not specifically oriented toward utility plants.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Fee

Istanbul	US\$ 6,000 per Delegate + VAT . This rate includes Participants Pack (Folder, Manual, Hand-outs, etc.), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Doha	US\$ 6,000 per Delegate. This rate includes H-STK [®] (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

In addition to the Course Manual, participants will receive an e-book entitled “Boiler Operator’s Guide”, published by McGraw-Hill Professional

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations:-

- 
The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

- 
British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Alex Iliadis is a **Senior Engineer** with over **40 years** of in-depth industrial experience within the **Petrochemical, Oil & Gas** and **Refinery** industries. His wide expertise covers in the areas of **Boiler & Steam System Management, Process Reactors, Catalytic Reformer Unit, Process Systems Foundations, Gas Processing Plant Operations & Control, Gas Processing Monitoring & Troubleshooting, Chemical Engineering, Process Equipment Design & Troubleshooting, Polymers & Polymerization, Applied Process Engineering, Process Plant Optimization, Process Plant Troubleshooting & Engineering Problem Solving, Process Plant Performance & Efficiency, Flare Blowdown & Pressure Relief Systems, Polypropylene Manufacturing, Polyethylene & Process Troubleshooting, Ammonia, Ethylene, Solvents, Gas Feed, EDC, VCM, PP, PVC, Chlorine, Fluidized Bed Reactor, Oil Movement & Storage, Power Plant Chemistry, Catalyst Manufacturing Techniques, Fuel Systems Management, Process Design & Optimization, Aviation Fuel, Diesel Engine, Jet Fuel, Petrol, IP Octane, Cetane Control, Pipeline Distribution, Boiler Fundamental Preparation, Flocculation Sedimentation, Hotline Water Softening Processes, Desalination Processes, Reverse Osmosis, Molecular Sieves, Loop Water Management System, Sludge Removal, Cooling Water System, Tank Farms, Hydrocarbons, Energy Conservation, Plant Electrical Power Generation & Cogeneration, Natural Gas Equipment & Networks, Furnaces/Combustion Facilities, Equipment Engineering Design, Rotating Equipment (Pumps, Compressors, Gas Turbines, Refrigeration Systems, etc), LPG Storage Installations, Petroleum Refining Storage Tunnel Installations, Industrial & Commercial Refrigeration Systems** and various application codes such as the API, ANSI, ASME, SHRAE, NFPA, ASTM, etc.

During his career life, Mr. Iliadis has gained his practical and field experience through his various significant positions and dedications as the **Production & Technical Manager, Technical & Logistics Manager, Project Manager, Project Director, Start-up Leader, Technical Section Head, Engineering Consultant and Process Design & Project Engineer** for **Hellenic Petroleum, EXXON, ESSD-PAPPAS Refining & Petrochemicals** and **EBZ Sugar Production Plant** industry within the **European & the USA** regions.

Mr. Iliadis has a **Bachelor's** degree in **Chemical Engineering** from the **University of Thessaloniki (Greece)**. Further, he is a **Certified Instructor/Trainer** and has delivered numerous trainings, courses, workshops, seminars and conferences internationally.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1

0730 – 0800	<i>Registration & Coffee</i>
0800 – 0815	<i>Welcome & Introduction</i>
0815 – 0830	PRE-TEST
0830 – 0900	<i>How to Tune-up a Boiler</i>
0900 – 0915	<i>Break</i>
0915 – 1115	<i>How to Tune-up a Boiler (cont'd)</i>
1115 – 1215	<i>Troubleshooting Problems</i>
1215 – 1230	<i>Break</i>
1230 – 1420	<i>Troubleshooting Problems (cont'd)</i>
1420 – 1430	Recap
1430	<i>Lunch & End of Day One</i>

Day 2

0730 – 0900	<i>Waste Heat Recovery</i>
0900 – 0915	<i>Break</i>
0915 – 1030	<i>Waste Heat Recovery (cont'd)</i>
1030 – 1215	<i>Use of Test Instruments</i>
1215 – 1230	<i>Break</i>
1230 – 1420	<i>Use of Test Instruments (cont'd)</i>
1420 – 1430	Recap
1430	<i>Lunch & End of Day Two</i>

Day 3

0730 – 0900	<i>Using Computers to Cut Costs</i>
0900 – 0915	<i>Break</i>
0915 – 1045	<i>Using Computers to Cut Costs (cont'd)</i>
1045 – 1215	<i>Standard Plant Calculations</i>
1215 – 1230	<i>Break</i>
1230 – 1420	<i>Standard Plant Calculations (cont'd)</i>
1420 – 1430	Recap
1430	<i>Lunch & End of Day Three</i>

Day 4

0730 – 0900	<i>Boiler Plant Safety</i>
0900 – 0915	<i>Break</i>
0915 – 1045	<i>Boiler Controls</i>
1045 – 1215	<i>60 Ways to Improve your Plant</i>
1215 – 1230	<i>Break</i>
1230 – 1420	<i>Steam Distribution Systems</i>
1420 – 1430	Recap
1430	<i>Lunch & End of Day Four</i>

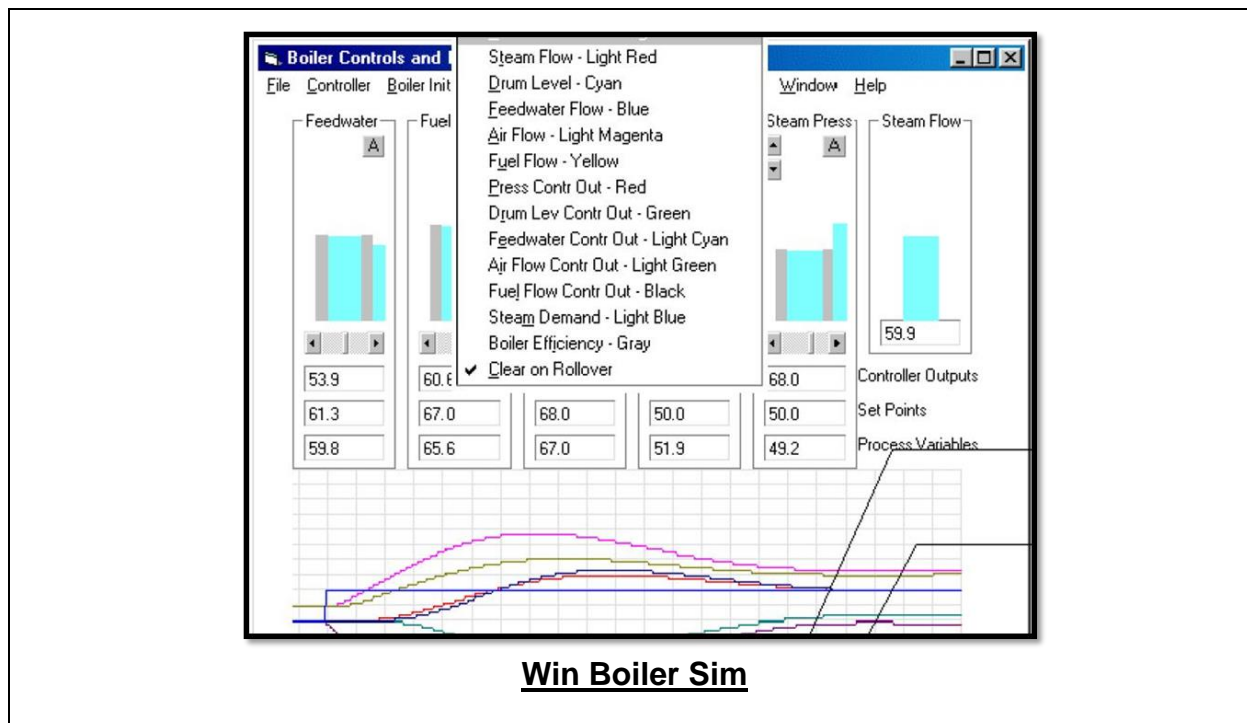

Day 5

0730 – 0900	<i>Steam Traps</i>
0900 – 0915	<i>Break</i>
0915 – 1030	<i>Steam Traps (cont'd)</i>
1030 – 1215	<i>Pollution Control</i>
1215 – 1230	<i>Break</i>
1230 – 1345	<i>Pollution Control (cont'd)</i>
1345 – 1400	<i>Course Conclusion</i>
1400 – 1415	<i>POST-TEST</i>
1415 – 1430	<i>Presentation of Course Certificates</i>
1430	<i>Lunch & End of Course</i>

Simulator (Hands-on Practical Sessions)

Practical session will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using the simulator “Win Boiler Sim”.

Book(s)

As part of the course kit, the following e-book will be given to all participants:

Title : Boiler Operator's Guide
ISBN : 978-0070365742
Author : Anthony Kohan
Publisher : McGraw-Hill Professional

Course Coordinator

Kamel Ghanem, Tel: +971 2 30 91 714, Email: kamel@haward.org
