

**COURSE OVERVIEW IE0527**  
**Maintain Instrumented Protection System (IPS) & Process Control System**

**Course Title**

Maintain Instrumented Protection System (IPS) & Process Control System

**Course Date/Venue**

October 27-31, 2024/Sharjah Meeting Room, The Tower Plaza Hotel, Dubai, UAE

**Course Reference**

IE0527

**Course Duration/Credits**

Five days/3.0 CEUs/30 PDHs

**Course Description**

***This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.***

This course is designed to provide participants with a detailed and up-to-date overview of Instrumented Protection System (IPS) & Process Control System Maintenance. It covers the types, regulatory requirements and standards of IPS; the fundamentals of process control systems, safety instrumented systems (SIS) and IPS design principles; the process control system design and programmable logic controllers (PLCs); the IPS installation procedures, process control system installation and IPS commissioning; and the commissioning of process control systems.

During this interactive course, participants will learn the operational readiness and handover, safety and compliance check; the preventive maintenance and process control systems troubleshooting; the performance monitoring and optimization, documentation, record-keeping and advanced control strategies; integrating IPS with process control systems; the cybersecurity for IPS and process control systems; the reliability and availability engineering, remote monitoring and control; the emerging trends and technologies; and the emergency response drills.

## Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an in-depth knowledge on instrumented protection system (IPS) and process control system maintenance
- Discuss the types, regulatory requirements and standards of IPS
- Explain the fundamentals of process control systems, safety instrumented systems (SIS) and IPS design principles
- Discuss process control system design and programmable logic controllers (PLCs)
- Carryout IPS installation procedures, process control system installation and IPS commissioning
- Commission process control systems through process testing of control loops, calibration and tuning and system handover procedures
- Employ operational readiness and handover, safety and compliance check as well as preventive maintenance of IPS
- Apply preventive maintenance of process control systems and troubleshoot IPS and process control systems
- Carryout performance monitoring and optimization, documentation and record-keeping and advanced control strategies
- Integrate IPS with process control systems and recognize cybersecurity for IPS and process control systems
- Discuss reliability and availability engineering as well as apply remote monitoring and control
- Explain the emerging trends and technologies and develop emergency response drills

## Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials, sample video clips of the instructor’s actual lectures & practical sessions during the course conveniently saved in a **Tablet PC**.

## Who Should Attend

This course provides an overview of all significant aspects and considerations of instrumented protection system (IPS) and process control system maintenance for process control engineers and supervisors, instrumentation and control system engineers, instrumentation engineers and technologists, process engineers, electrical engineers and supervisors and for all power plant system and control operators.

### Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

### Certificate Accreditations

Certificates are accredited by the following international accreditation organizations: -

- 
The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

- 
British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

### Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

**Mr. Ihab Al-Mughrabi, BSc, CAP**, is a **Senior Instrumentation Engineer** with extensive years of experience in the areas of **Pneumatic & Hydraulic Systems, Power Electronics VSD, Electrical Wiring (Control & Power), Pneumatic & Hydraulic Diagram, AutoCAD & PROEngineer (2D & 3D), CISCO, MATLAB SimPowerSystems, Instrumentation Control & Automation, Fiscal Metering Systems, Pressure Control Valves, Control Valves Selection & Sizing, Instrument & Telecom Construction & Commissioning, HAZOP, Instrument Calibration & Control, Fiber Optics, Process Instrumentation, Safeguarding & Asset Integrity Systems, Motorized & Pneumatic Valve Actuators, Control System Specification, CCTV System, FATs & SATs, Metering Skid, Programmable Logic Controllers (PLC), Distributed Control Systems (DCS), Supervisory Control & Data Acquisition (SCADA) Systems, Safety Instrumented Systems (SIS), Safety Integrity Level (SIL), Emergency Shutdown (ESD), Flowmetering & Custody Measurement, Multiphase Flowmetering, Measurement & Control, Process Control, Control Systems & Data Communications, Instrumentation, Automation, Valve Tuning, Alarm Management Systems, Engine Management System, Fieldbus Systems, P&IDs, Instrument Index & Data Sheets, Loop, Sequence, Hook Up & Control Panel Drawings, Control Philosophy, Cause & Effect Diagrams, System Architecture, Electrical Equipment Installation, Switchgear, Control Gear, Transformer, Panels & Boards, Cabling, Termination & Testing, Instrument, JB, Cabinets & Panel Installation, Instrument Air & Impulse Line Installation, Factory & Site Acceptance Tests for DCS, ESD, Fiscal Metering Skid & Control Valves and Root Cause Analysis.**

During his career life, Mr. Ihab has gained his practical and field experience through his various significant positions and dedication as the **Senior Control Engineer, Electrical & Instrumentation Engineer, Instrumentation Engineer, Electrical Maintenance Department Head and Senior Technical Instructor/Trainer** for numerous international companies like the Arab Aluminum Industry CO. LTD, **Jordan Petroleum Refinery CO.**, Jordan Bromine CO. and **ADNOC Refining Co.**, just to name a few.

Mr. Ihab has a **Bachelor's degree in Mechatronics Engineering**. Further, he is a **Certified Instructor/Trainer, a Certified Automation Professional (CAP)** from the International Society of Automation (ISA), **Safety Instrument System Expert, Certified Project Management Professional, Certified Functional Safety Engineer** and has delivered numerous trainings, courses, seminars and workshops internationally.

### Course Fee

**US\$ 5,500** per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

### Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

### Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

### Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the workshop for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

#### **Day 1: Sunday, 27<sup>th</sup> of October 2024**

0730 – 0800	Registration & Coffee
0800 – 0815	Welcome & Introduction
0815 – 0830	<b>PRE-TEST</b>
0830 – 0930	<b>Overview of Instrumented Protection Systems (IPS)</b> Definition & Importance • Types of IPS • Regulatory Requirements & Standards
0930 – 0945	Break
0945 – 1030	<b>Fundamentals of Process Control Systems</b> Basic Concepts of Process Control • Key Components & Architecture • Control Strategies & Algorithms
1030 – 1130	<b>Safety Instrumented Systems (SIS)</b> Introduction to SIS • Functional Safety & SIL (Safety Integrity Level) • Lifecycle of SIS
1130 – 1215	<b>IPS Design Principles</b> Design Considerations • Selection of Sensors, Actuators & Controllers • Redundancy & Fault Tolerance
1215 – 1230	Break
1230 – 1330	<b>Process Control System Design</b> Control Loop Design • Feedback & Feedforward Control • Advanced Control Strategies
1330 – 1420	<b>Basics of Programmable Logic Controllers (PLCs)</b> Basic Architecture & Operation • Programming & Configuration • PLCs in IPS & Process Control Systems
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day One

**Day 2: Monday, 28<sup>th</sup> of October 2024**

0730 – 0830	<b>IPS Installation Procedures</b> Site Preparation & Safety Measures • Installation of Sensors & Actuators • Wiring & Signal Testing
0830 – 0930	<b>Process Control System Installation</b> Hardware & Software Installation • Network & Communication Setup • System Integration
0930 – 0945	Break
0945 – 1100	<b>Commissioning of IPS</b> Pre-commissioning Checks • Functional Testing & Verification • Documentation & Reporting
1100 – 1215	<b>Commissioning of Process Control Systems</b> Testing of Control Loops • Calibration and Tuning • System Handover Procedures
1215 – 1230	Break
1230 – 1330	<b>Operational Readiness &amp; Handover</b> Operator Training & Familiarization • Start-up Procedures • Transition to Steady-State Operations
1330 – 1420	<b>Safety &amp; Compliance Checks</b> Ensuring Regulatory Compliance • Safety Audits & Inspections • Risk Assessment & Mitigation
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Two

**Day 3: Tuesday, 29<sup>th</sup> of October 2024**

0730 – 0830	<b>Preventive Maintenance of IPS</b> Scheduled Inspections & Testing • Calibration & Recalibration Procedures • Replacement of Critical Components
0830 – 0930	<b>Preventive Maintenance of Process Control Systems</b> Routine Maintenance Activities • Software Updates & Patches • Backup & Recovery Procedures
0930 – 0945	Break
0945 – 1100	<b>Troubleshooting IPS</b> Common IPS Issues & Failures • Diagnostic Tools & Techniques • Corrective Actions & Repairs
1100 – 1215	<b>Troubleshooting Process Control Systems</b> Identifying Control System Malfunctions • Root Cause Analysis • System Restoration Procedures
1215 – 1230	Break
1230 – 1330	<b>Performance Monitoring &amp; Optimization</b> Monitoring System Performance • Analyzing Performance Data • Implementing Improvements
1330 – 1420	<b>Documentation &amp; Record-Keeping</b> Maintenance Logs & Records • Incident Reporting • Compliance Documentation
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Three

**Day 4: Wednesday, 30<sup>th</sup> of October 2024**

0730 – 0830	<b>Advanced Control Strategies</b> Model Predictive Control (MPC) • Adaptive Control • Multivariable Control
0830 – 0930	<b>Integration of IPS with Process Control Systems</b> Communication Protocols & Standards • Data Exchange & Interoperability • Integrated Safety & Control Systems
0930 – 0945	Break
0945 – 1100	<b>Cybersecurity for IPS &amp; Process Control Systems</b> Threats & Vulnerabilities • Cybersecurity Best Practices • Incident Response & Recovery
1100 – 1215	<b>Reliability &amp; Availability Engineering</b> Ensuring System Reliability • Redundancy & Failover Mechanisms • Availability Optimization
1215 – 1230	Break
1230 – 1330	<b>Remote Monitoring &amp; Control</b> Remote Access Technologies • Benefits & Challenges • Case Studies & Applications
1330 – 1420	<b>Emerging Trends &amp; Technologies</b> Industrial Internet of Things (IIoT) • Machine Learning & Artificial Intelligence in Control Systems • Future of IPS & Process Control Systems
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Four

**Day 5: Thursday, 31<sup>st</sup> of October 2024**

0730 – 0830	<b>Hands-on IPS Maintenance</b> Practical Exercises in Calibration & Testing • Fault Diagnosis & Correction • Real-World Case Studies
0830 – 0930	<b>Hands-on Process Control System Maintenance</b> Control Loop Tuning Exercises • System Integration & Testing • Troubleshooting Scenarios
0930 – 0945	Break
0945 – 1100	<b>Simulation &amp; Modeling</b> Using Simulation Tools for Training • Modeling Control Systems • Analyzing Simulation Results
1100 – 1230	<b>Emergency Response Drills</b> Simulated Emergency Scenarios • Response Procedures & Best Practices • Post-Drill Analysis & Feedback
1230 – 1245	Break
1245 – 1345	<b>Group Projects &amp; Presentations</b> Group Work on IPS & Process Control Challenges • Presentation of Findings & Solutions • Peer Review & Feedback
1345 – 1400	<b>Course Conclusion</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course
1400 – 1415	<b>POST-TEST</b>
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

**Simulator (Hands-on Practical Sessions)**

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using one of our state-of-the-art simulators “Allen Bradley SLC 500”, “AB Micrologix 1000 (Digital or Analog)”, “AB SLC5/03”, “AB WS5610 PLC”, “Siemens S7-1200”, “Siemens S7-400”, “Siemens SIMATIC S7-300”, “Siemens S7-200”, “GE Fanuc Series 90-30 PLC”, “Siemens SIMATIC Step 7 Professional Software”, “HMI SCADA”, “Gas Ultrasonic Meter Sizing Tool”, “Liquid Turbine Meter and Control Valve Sizing Tool”, “Liquid Ultrasonic Meter Sizing Tool” , “Orifice Flow Calculator” and “Automation Simulator”.

**Allen Bradley SLC 500 Simulator**

**Allen Bradley Micrologix 1000 Simulator (Digital)**

**Allen Bradley Micrologix 1000 Simulator (Analog)**

**Allen Bradley SLC 5/03**

**Allen Bradley WS5610 PLC Simulator PLC5**

**Siemens S7-1200 Simulator**

**Siemens S7-400 Simulator**

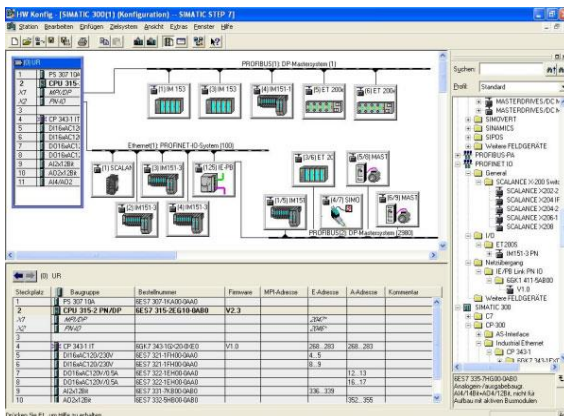

**Siemens SIMATIC S7-300**

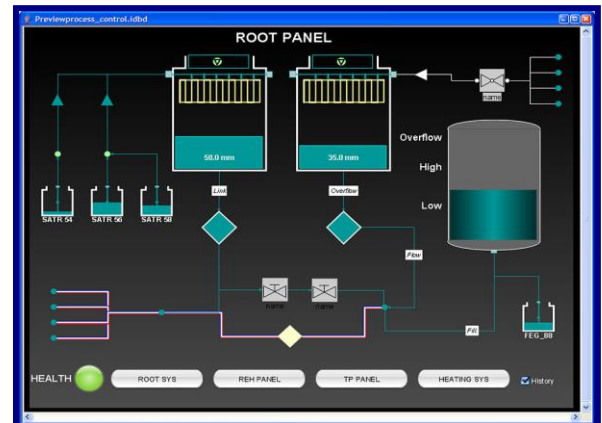

**Siemens S7-200 Simulator**

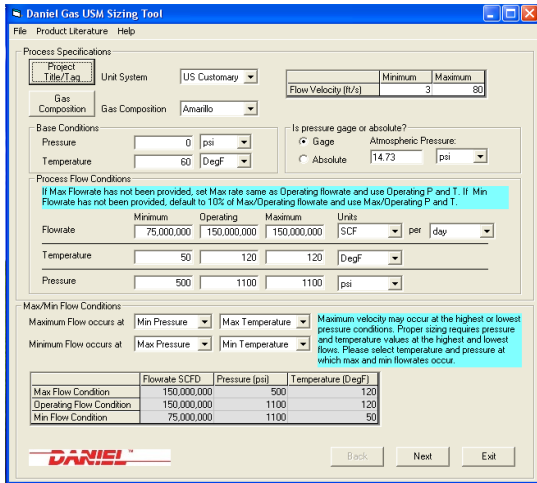

**GE Fanuc Series 90-30 PLC Simulator**

**Siemens SIMATIC Step 7 Professional Software**

**HMI SCADA**

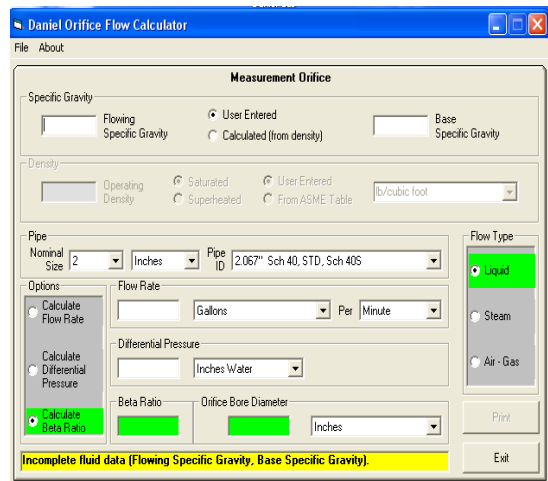

**Gas Ultrasonic Meter (USM) Sizing Tool Simulator**

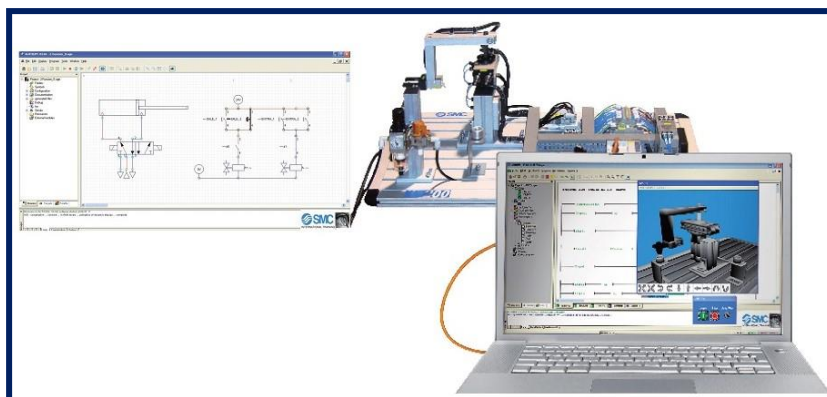

**Liquid Turbine Meter and Control Valve Sizing Tool Simulator**

**Liquid Ultrasonic Meter Sizing Tool Simulator**

**Orifice Flow Calculator Simulator**

**AutoSIM – 200 Automation Simulator**

**Course Coordinator**
